OUR PLANT

We customize our products according to the need of our customers. We are capable of producing wide-range of various high-quality products for automobile and forging plants at PAN India level. The products find its applications in gear and transmission manufacturing facilities, heat treatment facilities, cement & thermal power plants. Our Investment casting products also find presence in decorative, hardware, plumbing, fire-fighting and many more areas where precision cast parts are required.

PRODUCT RANGE

Sempitern India is counted amidst the most trusted manufacturers and exporters of SS castings, Alloys castings, as well as Fixtures of furnaces etc. Our products are known for flawlessness and meet international market standards. The Product range includes:

OUR QUALITY

Following the quality of our service thus having gained trust of our many clients.

About Sempitern India

Established in the year 1971 by Mr. S. D. Sharma and Mr. V. P. Sharma, we have come a long way and carved a niche for ourselves in the most specialised field of Stainless Steel Castings Products ranging from Impellers, Discs etc. to Heat Resistant Stainless Steel Castings for Normalizing, Annealing, Tempering, Sealed Quench, Vacuum, Pit Type Furnaces (Including Base Trays, Intermediate Grids, Spacers, Gear Links, Suspenders, Base Spiders, Middle Spiders, Center Rods etc.) are currently being produced & delivered to companies across India.

Sempitern, the proven expertise of many years in the field of manufacturing and supplying the above mentioned casted and fabricated items to leading Automobile and Forging plants all over India.

We have a team of dedicated people who have a missionary zeal to indigenously develop superior quality products. Our company's policy is to provide good quality casting and components as per the customers requirement and satisfy them with quick supply and prompt technical services.

HEAT RESISTANT CASTING

The offered Heat Resistant Casting is made available by us for use in the various commercial and industrial applications. They are those compositions that contain at least 12% chromium which are capable of performing satisfactorily when used at temperatures above 1200 F. The heat-resistant compositions are higher in alloy content than the corrosion-resistant types. The castings are used when cast irons cannot deliver enough strength or shock resistance. The casting is the product formed by pouring liquid steel into a mould cavity. The offered Heat Resistant Casting is very efficient and necessary for use in the various industrial processes and applications.

- Heat Resistant Fixtures For Gas Carburizing Fixtures
- Heat Resistant Base Trays, Rails & Rollers For Normalizing Furnace
- Heat Resistant Base Grids For Sealed Quench Furnaces
- Corrosion Resistant Castings For Food & Biotech, Flow Control Valves Etc.

- Cast Trays Basket
- Casted Grid
- Base Trays
- Base Spiders Segments Casting
- Bull Gear Hangers
- Stainless Steel Casting
- Casting TrayCasting Tray

INVESTMENT CASTING PARTS

Entire stock of these Investment Casting Parts is manufactured with the use of mild & stainless steel and innovative techniques. For casting metal components in different sizes, patterns and designs, the provided parts are used in industries for their toughness, malleability and high tensile strength. The offered parts are known to manufacture machine and automobile components with high dimensional uniformity by pouring molten metal into the moulds.

KEY POINTS:

- # Available in standard sizes along with weight 100 kg
- # Known for anti-corrosive surface finish
- # Demanded in shipbuilding, automobile, medical and several other engineering industries

PRICE AND QUANTITY:

- **Price Range** : 500.00 - 3000.00 INR/Kilograms
- **Minimum Order Quantity** : 100 Kilograms

TRADE INFORMATION:

- **Supply Ability** : 30 Metric Tons Per Month
- **Delivery Time** : 3-4 Week
- **Sample Available** : Yes
- **Packaging Details** : WOODEN PACKING
- **Main Domestic Market** : All India
- **Certifications** : ISO (9001-2015)

RELATED PRODUCTS

- ✓ Heat Resistant Base Grids For Sealed Quench Furnaces
- ✓ Heat Resistant Fixtures For CGCF Furnaces – Fixtures For Small Gears
- ✓ Heat Resistant Castings For Boiler, Cement Industries & Oil Drilling Equipment's

BRASS CASTINGS

Brass is a generic name that encompasses alloys made from copper and zinc. Brass casting involves using these metal alloys to form metal parts efficiently. We are the leading supplier & manufacturer of brass casting. We provide this in various specifications and sizes as per the industrial requirements. We can easily customize brass castings, which is available in pendants, pins, earrings, finger rings and various other shapes. Custom designs and special orders available. We can make as per the customer customized designs from drawings, 3d model, sample and concepts. We make high quality products to meet our customer's requirements.

Applications:

Valves, cocks, plumbing fittings, marine fittings, pipe fittings, gas fittings, door & furniture fittings, hardware, electrical trade & ornamental castings, brush holders, switchgear brush holders, pump bodies, bolts, nuts, end plates for heat exchange equipment, small machine parts, flanges, imitation jewellery

SS FABRICATION

Our offered Basket For Sqf finds its application in numerous chemical and thermal processes including nitriding. The provided basket is manufactured using top quality raw materials with the aid of ultra-modern machines as per the international quality standards. It can be bought from us at rock bottom prices by our prestigious clients within minimum quantity order. The offered Basket For Sqf can be designed as per the client needs and requirements under the observation of our deft professionals.

KEY POINTS:

- # Easy to handle
- # Excellent durability
- # Flawless finish
- # Corrosion resistance

SAND CASTINGS

Sand casting, also known as sand moulded casting, is a metal casting process characterized by using sand as the mould material. Sand casting is a manufacturing process in which liquid metal is poured into a sand mould, which contains a hollow cavity of the desired shape and then allowed to solidify. Sand castings can make castings in a wide range of sizes and weights with extremely complex geometries utilizing a wide range of metals. Sempitern India has established a solid reputation in the casting industry and built a better relationship with customers by providing the best casting and manufacturing services.
