OUR MAIN PRODUCT

Abhay Enviro
Engineering
Pvt. Ltd.

WATER TREATMENT SYSTEMS

We offer premium range of Water Treatment Plant. It is manufactured by using modern technology and by conforming to the international standards of the industry.

INDUSTRIAL FILTRATION SYSTEMS

Activated Carbon Filter uses hi-grade granular carbon columns and uses Adsorption Technology to remove the organic contaminants from the raw water. The Activated Carbon observes bad color, odour, residual chlorine and volatile organic compounds.

CLARIFIERS

Avail from our firm distinct quality Peripheral Clarifiers that are developed by our experts using the latest technological advancements. Its components include a specially designed central pivotal slewing ring bearing which has a high tensile strength and robust construction.
